### **Career Objective**

As a passionate web developer with a strong background in corporate and startup environments, I'm driven to expand my skills as a full-stack developer. I'm excited to utilize emerging technologies to craft innovative digital solutions that propel business growth and deliver exceptional user experiences.

### **Technical Skills**

**Web Development:** HTML, CSS, JavaScript, React.js (Java-script library)

**Back-End Development:** Handling APIs, Asynchronous JavaScript

**Frameworks & Package Managers:** CSS Frame-work - Bootstrap & Tailwind, npm (Node Package Manager)

**Developer-Tools:** Microsoft Excel, Microsoft Word, Visual Studio Code, Chrome Dev Tools, Git & GitHub.

**Soft Skills:** Communication, Problem-Solving, Adaptability, Team Management.

### **Work Experience**

**Amoghnya Tech Solutions Pvt Ltd | Junior Developer** April 2023 - April 2024

- Developed user-facing features for internal platforms using HTML, CSS, JavaScript, and Bootstrap.
- Utilized agile methodologies and collaborative version control with GitHub.
- Designed and implemented intuitive and responsive user interfaces to enhance user experience.
- Worked with cross-functional teams to deploy applications and troubleshoot performance issues.

**Cognizant Technology Solutions India Pvt Ltd | Program Analyst Trainee | Internship** Mar 2022 - Nov 2022

- Contributed to the development, documentation of software programs using JavaScript, HTML, and CSS.
- Acquired valuable experience in Java-based OOP applications and problem-solving methodologies.
- Developed proficiency in creating dynamic content, driving engaging and interactive user experiences.
- Collaborated with team members to deliver high-quality solutions that streamlined internal processes.

### **Education**

Bachelor of Technology, Computer Science Engineering, CMR Engineering College, Hyderabad.

**CGPA:** 6.41 (60.8%) Jun 2018 – Aug 2022

### **Projects**

**Dynamic Movie Explorer | Technologies:** React, React Router, TMDB API, CSS Modules | [Dynamic Movie Explorer](#).

- Developed a dynamic movie listing platform using the TMDB API, featuring categorized listings and an interactive carousel.
- Utilized React hooks (useState, useEffect) and React Router for efficient state management and smooth navigation.
- Designed responsive UI components with CSS Modules to ensure a seamless experience across devices.

**Weather Application | Technologies:** HTML, CSS, JavaScript, Open Weather-API | [Weather Application](#).

- Developed a responsive weather app displaying real-time data (temperature, humidity, wind speed).
- Added dynamic icons, error handling, and a clean UI for improved user experience.
- Used asynchronous JavaScript for fast, accurate data fetching across devices.

**Personal Portfolio | Technologies:** React.js, Tailwind, Library: react-router-DOM | [Personal Portfolio](#).

- Developed a responsive personal portfolio website using Tailwind CSS, featuring a modern UI design that ensures a clean and professional appearance across various devices.
- Integrated React components to create dynamic and interactive user experiences, including a project showcase to highlight skills and personal projects.
